ICANN Meetings

The 2nd At-Large Summit (ATLAS II) FINAL DECLARATION

Five years after the first At-Large Summit (ATLAS I, Mexico City, March 2009), the At-Large Advisory Committee (ALAC) chose “The Global Internet: the User Perspective” as the overall theme for its second At-Large Summit (ATLAS II, London 2014). Internet end-users and/or their representatives, as well as many representatives of At-Large Structures (ALSs) participated in a week of meetings and 2 days of brainstorming sessions in order to develop a range of recommendations and observations on the future direction of ICANN. This work was carried out in 5 thematic groups.

In the following paragraphs, the ALAC presents its ATLAS II Declaration on these recommendations (to the ICANN Board and/or ALAC itself) and observations (to individuals and organizations promoting a more inclusive Internet).

Upcoming Challenges on gTLDs

ICANN New gTLDs Program

In 2011,

31 July 2014, London GAC minutes,

Child related gTLDs:

.kid, .kids, .kinder, .game, .games, .juegos,
.play, .school, .schule and .toys

<https://gacweb.icann.org/display/gacweb/Governmental+Advisory+Committee>

‘New’ trend of generic Top Level Domains

- From Internet Watch Foundation 2015 Annual Report
- 436 websites (in 2015) using new gTLD domains to share child sexual abuse material. 138 of these were disguised websites.

Empowering next generation is the
key for facing risks and challenges
